Edits for the Special Education Annual Data Report for 2002

The Special Education Annual Data Report (ADR) contains data on students with disabilities by eligibility category, age, federal placement group, and racial-ethnic-gender group, among others. The rows and columns on each table will be totaled automatically in the WEB application. In addition, the relationships among the tables will be automatically edited to assure that the data is entered correctly before the report is submitted. These table edits are as follows:
